

ASEKO OY

TECHNICAL TRADE EXPERT

Aseko's sound experience in the technical trade culminates in skilled employees and an extensive stock of quality products combined with our own workshop.

Aseko's sales are customer-driven, serving different sectors of the process and engineering industry. Flexible service is further enhanced by our own workshop, through which passes a considerable share of the valves we deliver. Aseko experts work skilfully together to supply the customer with demanding control and automation valves.

Aseko is a dependable supplier. Decades of experience as a supplier of valve systems in industrial projects has made Aseko's employees into project management experts.

AMONG OUR WELL-KNOWN AND TRUSTED TRADEMARKS

ARE

Klinger • El-o-matic • Somas •
Lohse • Wouter Witzel •
Kinetrol • Sempell

ASEKO VALVES

Aseko's core expertise is in industrial valves and their automation. Aseko is the leading importer and stockist of these products in Finland. Since our valve programme features the leading brands on the market, we can provide customers with exactly the right product for even the most challenging project.

Aseko's comprehensive valve catalogue containing over a hundred pages is an institution in the industry. We are pleased to say that all product information is now available on our website, which is constantly updated with the latest technical data.

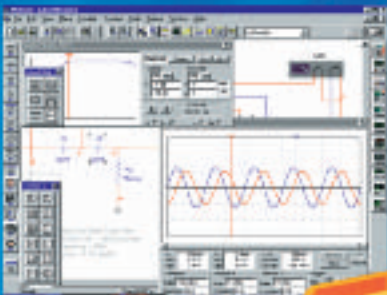

Active head-up IR camera for rescue work

Safety, speed and effectiveness. The camera is attached to the helmet, thus leaving both hands free for rescue work. This IR camera can be switched from one helmet or person to another in a matter of minutes.

Topica TP-2000DS CCD camera

CCD cameras, monitors and recorders for surveillance systems

Electronics Workbench

Electronics design and simulation software

TES-1601 Insulation tester

Test and measuring instruments for maintenance and service

Solartron position sensor and display unit

Sensors to measure e.g. position, pressure, acceleration and force

ASEKO ELECTRONICS DIVISION

The Electronics Division has been part of the company's business ever since Aseko was established over 60 years ago. The Division's competitive edge is based on its extensive range of products, prompt deliveries and sound expertise. Careful choice of suppliers is also important to the success of the Electronics Division.

The Division's product suite includes sensors and other automation components, surveillance cameras, test and measuring instruments, microwave products and electronics simulation software. We are constantly searching for new products and principals to enable us to respond to the future needs of our customers.
